

AP+ becomes Ci5, Are you ready for the future?

Ci5 presentation at SITL, Paris Villepinte, 22-25 march

After the launch of Ci5 in Marseille on 3 December 2015, Jaap van den Hoogen, President of the MGI Executive Board, and Dominique Lebreton, Audits, Projects and Marketing Director, will present **Ci5 at the International Week of Transport and Logistics (SITL) on Wednesday 23 March from 4:15pm to 5pm in the Ateliers room.**

Ci5 (Cargo intelligence 5) is the new generation of smart software for goods management. Introducing the innovative, performant and flexible Ci5 system. It goes well beyond what Port Community Systems and Cargo Community Systems have offered up to now, covering all port, airport and hinterland logistics activities.

MGI will also take part in other sessions:

- ***Freight forwarders Workshop***, organised by Medlinks Ports in partnership with AUTF, room N°611, Tuesday 22 March at 2:30pm. Dominique Lebreton will speak alongside customs, Lyon Terminal and pre-post carriers.
- ***Regions driving logistics innovation: the example of Brittany***, Wednesday 23 March 9:30am – 10:30am, Conference Room 3. Dominique Lebreton will talk about the implementation of AP+ in 2015 at Lorient, Brest and Saint-Malo ports.

MGI is co-exhibitor one the Via Marseille Foss stand J87. More information on : www.sitl.eu.

ABOUT MGI

For 30 years, MGI has been designing and implementing Cargo Community Systems for port, airport and inland transport communities in France and abroad.

Tried and tested expertise

The keys to this success are respect, close and attentive customer relationships, and in-depth knowledge of freight transport and logistics. MGI solutions are designed in partnership with users which makes all the difference.

Bespoke services

Services: auditing and consultancy; software publishing, integration and operation; B2B integration services; support in change management; user training and assistance services.

Software solutions: AP+, AirPort+, Inland+, M-customs, Tracking 2.0 and soon Ci5.

Innovating for the future

Ci5 includes eight areas of major innovation

- Smart objects and intelligent cargo
- Connection to smart containersBusiness intelligence
- Big Data
- CO2 calculation
- Ex-works carrier appointments
- Global positioning
- Digital vault

New technologies make cargo intelligent. It can be traced from door to door. MGI streamlines data flows between stakeholders, making them smoother, more traceable and competitive, to ensure optimum management of their logistics operations. This is a new era, and MGI is already stepping in.
