

**Press Release**  
19 February 2020

## **MGI, the digital backbone for Smart Ports, will be attending SITL 2020**

Today, MGI is announcing that it will be attending the Transport and Logistics Innovation Week (SITL). Join us from 17 to 20 March in Paris (Parc des expositions, Villepinte) on stand **F43**.

**It's the event not to be missed for innovation in transport, the logistics industry and the supply chain.**

This is an essential trade show for professionals in the Smart Ports ecosystem, and naturally, MGI confirmed their presence.

After being chosen by 13 port communities and 2 airport communities, MGI, the digital backbone for Smart Ports, is continuing the national and international deployment of Ci5, the latest generation Cargo Community System! Come and meet the MGI teams and find out more about Ci5, the digital platform that's revolutionizing information exchange between port professionals.

You can also find out more about a number of innovative MGI projects, in particular:

- MeRs project (blockchain to support logistics along the Mediterranean-Rhône-Saône route)
- Channel 5 services (artificial intelligence to serve port communities).

SITL will offers visitors four days of conference sessions, panel discussions and themed days. Highlights include Maritime Day and Connections on Thursday 19 March, the Road Haulers' Forum on Tuesday 17 March at 3:15pm and the Innovation Ceremony on Thursday 19 March at 5pm.

Port communities, startups and professionals interested in innovation in the maritime industry can organise a meeting with an MGI representative by sending an email to the following address: [contact@gyptis.fr](mailto:contact@gyptis.fr)

### **ABOUT MGI**

As a recognized expert in Cargo Community Systems (CCS), we innovate to streamline and speed up cargo data exchanges between all private and public stakeholders. Our vision to "Connect supply chains using a smart information system offering smooth door-to-door goods tracking" is the backbone behind the development of our Cargo Community System.

We are ISO 27001 (Information Security Management) certified and work with ports of the future and logistics professionals, providing them solutions to improve their competitiveness.

#### **Solutions:**

- Ci5: next-generation CCS built on modern architecture and open source technologies, incorporating innovations from Big Data, IoT, Artificial Intelligence and Smart Containers.
- Channel 5: information channel and decision-making tool using Artificial Intelligence for managing goods in port environments

**Partnerships:** Thales for the development of Ci5 and the integration of blockchain technologies, CEA Tech for the artificial intelligence engine in Channel 5, and ANSSI for support in cybersecurity management methodologies.

**Distinctions:**

- Gold IT Award, IAPH, Indonesia, May 2017, Smart Port 2.0 Project, for the Neptune Port and Ci5 solutions.
- Port of the Future Award, Paris, September 2017, in the logistics category, with Channel 5.
- Jury's Choice Award at the Med'Innovant competition, November 2017, for Channel 5
- Digital Transformation Award, Paris, March 2019, in partnership with Thales for the implementation of Ci5 at Marseille Fos Port
