

Marseilles, March 25 2022
Press release

Join MGI, experts in Port Community Systems, at SITL Transport and Logistics Innovation Week 2022

MGI is the smart port digital building block, and has today announced that it will be attending the Transport and Logistics Innovation Week (SITL). Join them from Tuesday 5 April to Friday 8 April in Paris (Parc des expositions, Villepinte) on stand **F068**.

This is the essential event for innovation in the transport, logistics and supply chain industry, and the place to be for everyone involved in smart ports, so it is natural for MGI to be there.

MGI develops solutions accessible to all port and hinterland supply chain professionals, from Ci5, the most comprehensive Port Community System on the market, to B2B services that facilitate integration with business systems across the industry. Through the Channel 5 module offering artificial Intelligence for ports and its “Smart Manifest”, MGI is deploying innovations to support the transformation of ports that are fully focused on the future.

There will be an MGI team on site throughout the trade show. Come and meet them to find out more about the various solutions the company is developing that are revolutionising data exchange between port professionals.

- Justine Camoin, Head of the Marketing & Sales Department, to find out more about MGI and its solutions.
- Charlotte Rosa, Business Developer, to find out more about the Hinterland features in Ci5.
- Christophe Reynaud, Head of the Innovation Department to understand MGI’s Business Intelligence solutions.

At SITL, visitors can also attend numerous conference sessions, panel discussions and themed conference days. In particular, there will be a “Shipping and Connections Day” on Thursday 7 April, around this year’s theme, “Decarbonisation of shipping: innovating to ensure supply chain continuity.” The day will also round off with the Innovation Awards ceremony.

Are you a start-up or part of the port community interested in innovation in the shipping industry?

Book your meeting with an MGI representative now, by emailing: sales@gyptis.fr

ABOUT MGI

As a recognized expert in Port Community Systems (PCS), we innovate to streamline and speed up cargo data exchanges between all private and public stakeholders. Our vision to “Connect supply chains using a smart information system offering smooth door-to-door goods tracking” has guided the development of the Port Community System.

We are ISO 27001 (Information Security Management) certified and work with ports of the future and logistics professionals, providing them solutions to improve their competitiveness.
